

SAC

Guest Speakers for Schools

The Environment

SAC are delighted to offer schools the opportunity of drawing on our expertise covering the spectrum of environmental issues.

At SAC Edinburgh, we have lecturing staff with a variety of backgrounds and areas of specialisation, and we will be happy to deliver lectures **free of charge** at local schools. Alternatively, schools are welcome to bring students to a lecture/practical session at our King's Buildings campus in Edinburgh, which would also allow students to experience a real-life higher or further education session.

The following is a selection of the modules/subject areas that we teach, and which may be of interest to students on various school courses. Please contact us for more information or to discuss subjects and content in more detail.
