specify

--

SECTION B: DISEASES

10 Please tick the appropriate box for the disease control programme you have selected

- BVD
- BVD Vaccinated Monitored Free (VMF) – (Lower level of Biosecurity)
- IBR
- Johne's Disease
- Leptospirosis
- Milk monitoring BVD
- Milk monitoring IBR
- Milk monitoring Leptospirosis

I understand that SAC or their agents may inspect my herd, the premises and the herd records in order to verify compliance with scheme rules, and that the evidence of failure to comply may result in the loss of my herd status.

SAC may vary the rules of the scheme and the level or method of charging, and shall have the right to terminate the scheme. I am entitled to withdraw from the scheme at any time but, if I do, no part of my fees will be refunded.

SAC uses the British Cattle Movement Service (BCMS) data to produce barcoded labels for sample testing. Your data is secure as we have 'read only' access to your records. If you do not wish us to access your data please let us know. Please note there will be an additional charge for label production where BCMS data is not used.

I authorise PCHS to include details of my stock and my telephone number on a database to be used in connection with sale of accredited/accrediting stock. (delete if you do not wish to be included in the database)

Our favoured position is that the PCHS is organised and supervised by the Veterinary Services of the Scottish Agricultural College in partnership with the practising veterinary surgeon. Where the veterinary practitioner is unable to provide consultancy there will be an additional charge levied by the PCHS client manager.

I confirm that my client has discussed this application with me. I am able/unable* to provide PCHS consultancy support to my client (*delete as appropriate).

Please let us know how you heard about PCHS/ What prompted you to join?:
