Caroline Gatto

Caroline is from Ireland and is studying for a HND in Environmental Protection

When I applied to the environmental protection course at the Scottish Agricultural College in Edinburgh, I went to visit and found Edinburgh to be an ideal environment for studying a land-based course. Even though you are in the city you are surrounded by the most beautiful countryside which is just minutes away.

The atmosphere at College is very friendly and to compliment the excellent teaching programme there is the Agricultural Society which provides a huge variety of social and sports events, including an annual black-tie ball and an adventurous weekend to visit the Dublin Agrics!!

My course is fantastic. I love it because it has such a diverse mixture of subjects; one minute I'm in wellies at a landfill site and the next I'm studying chemistry in a lab!

I would advise more students to apply to SAC as Scotland has a fantastic culture and SAC is a great place to learn.

SAC offers undergraduate courses in a range of subject areas including Adventure Tourism, Sustainability, Recreation, Business Management, Agriculture, Horticulture, Sport and Leisure, Animal Science, Heritage Studies, Landscape and Garden Design, Food Science, Environmental Protection, Rural Tourism, Biological Sciences, Equine Studies, Countryside and Conservation, Agricultural Science, Rural Resource Management, Poultry Studies, Rural Enterprise, and Environmental Studies.

We also offer postgraduate programmes in Business Management, Organic Farming, and Applied Poultry Science.

With campuses across Scotland in Edinburgh, Aberdeen and Ayr, degrees awarded by the ancient Universities of Glasgow and Edinburgh, and a range of HNC, HND and undergraduate and postgraduate degree courses, we have a great deal of choice to offer students. Please take a look at our web site to learn more about us!
