

# SAC

Scottish Agricultural College

## Student Profile

Virunpob Supab is from the north-east of Thailand and came to SAC to learn about Environmental Management and Planning. He is a representative of the Thai Government's Ministry of Natural Resources and Environment.

During his stay at SAC Edinburgh, Virunpob studied some modules at SAC (such as Environmental Planning and Waste Management) and also interacted with many other organisations to support his learning such as SEPA and local councils. He says:

"Scotland has a good "Greener Scotland" policy and waste scheme which are really good examples in the field which I can apply to my country. At SAC I have learn the theory, and also the practical ideas to take home.

"At SAC the teachers work very closely with the students and are very helpful. All of the staff here (the teachers, the library staff, the supporting staff) are very helpful, convenient, and supportive. The learning environment is excellent.

"Edinburgh is a safe city, and a sustainable city - with open spaces and gardens. In Edinburgh, you live in the city but the College feels like you are in the countryside. The people here are very friendly. I feel like I am at home in Scotland, even though I am a long way from Thailand."

**SAC offers a range of Undergraduate and Postgraduate courses, full-time and part-time, in subject areas including:**  
**Agriculture Sport and Tourism Horticulture and Garden Design**  
**Environment and Countryside Science and Technology Business**
