

## Veterinary Services

### Farm Animal Veterinary Diagnostic Services

SAC Consulting Veterinary Services provide a comprehensive postmortem service, diagnostic laboratory tests and routine health screening tests from our 8 disease surveillance centres throughout Scotland. The results help your practice provide an accurate and timely diagnosis of disease.

Veterinary surgeons, pathologists and laboratory scientists have in depth experience and expertise in all aspects of the investigation of disease in livestock, including poultry and gamebirds. The results of our investigations minimise losses and money wasted as a result of incorrect choice of treatment. Our routine health screening tests assist you and your vet assess the health and production status of your flock / herd to maximise returns from your business.

SAC Consulting Veterinary Services provide:

- Complete post mortem examination with added diagnostic tests.
- Targeted test packages for the investigation of common conditions such as abortion, diarrhoea, pneumonia and mastitis.
- Profiles for assessment of trace element, mineral and production status.
- Testing of blood samples to diagnose disease and monitor for diseases status.
- Investigation of reproductive failure.
- Bull and ram testing for breeding soundness.
- On farm consultancy with your own veterinary surgeon.

For further information contact your local SAC Disease Surveillance Centre or visit our website.
